

Grade 5 Resource

Monday, Tuesday & Thursday
9:49-10:19

We have Reading,
Writing, and Math Goals!

For **Reading** and **Writing** we use **Explode the Code** program, as well as, evidence-based practices of teaching and learning. The **Science of Reading** tells us that spelling is directly related to our phonics skills. Therefore, our goals work in conjunction with Reading and writing practices.

These programs and practices have proven to support students in building skills needed to progress along the *5 Stages of Literacy Development (to the right)*.

1	2	3	4	5
Phonemic Awareness focusing on, manipulating, breaking apart, and putting together sounds orally	Phonics (or "alphabetic") linking written letters to their sounds forming spelling patterns	Fluency achieving speed, accuracy, and expression in reading	Comprehension understanding the concepts read or heard	Vocabulary knowing words (both oral and written) and their meaning

For Mathematics we use the My Math program for Grade 5. This program aligns with our NYS Next Generation Standards.

We use the program to review concepts, and repeatedly practice mathematical routines to become Math Masters!

Thank you for participating in MCS's Open House 

Mrs. Sarah M. Cappabianca, MS.Ed.
